The Norwegian territory of Svalbard and the islands that make up the archipelago offer a tremendous wildlife and birdlife experience, as well as a fascinating lesson in glaciology. The islands were first used as a whaling base in the 17th and 18th Centuries and are now celebrated as a breeding ground for many seabirds, along with lots of marine mammals.

Start your North Spitsbergen cruise with a trek around historic Longyearbyen, then join our expedition to the north of the island to take in the fantastically beautiful landscapes, the thousands of seabirds, and of course the star of the show, the Polar Bear. Nothing can prepare you for your first sighting of a wild Polar Bear, the undisputed king of the Arctic.

The Svalbard archipelago is one of the most dramatic places on earth. Just 600 miles south of the North Pole, warmed by the most northerly waters of the Gulf Stream, this is a spectacular land of rugged mountains, extensive Arctic pack-ice drifting offshore, and the blue ice of ancient, awe-inspiring glaciers. Experience the majesty of these North Atlantic islands as we explore one of the last great wildernesses on earth.

Our voyage focuses on the western and northern coast of Spitsbergen, and as far north as the permanent pack ice. This area has the highest concentration of wildlife and places of historic and scenic interest in the archipelago.

Tour Highlights
- Take advantage of long daylight hours, coinciding with the height of the breeding season for most birds
- Watch for Purple Sandpiper, Red-throated Diver, Ptarmigan, Great and Arctic Skua, Long-tailed Duck, and Common Eider
- Witness wild Polar Bear hunting to sustain themselves through the long winter.
- Watch for the rare and beautiful Ivory Gull and endearing Dovekie
- Learn the natural history of this fabled archipelago
- Visit fascinating historic locations of early industry and exploration

Tour Summary
8-Day / 7-Night Svalbard Wildlife Photography Cruise
Starting at $3300 based on cabin type, from Longyearbyen Airport is Svalbard (LYR)
**Wed., June 10  Arrivals in Spitsbergen**
Welcome to Spitsbergen! We touch down today in Longyearbyen, the administrative center of the island of Spitsbergen, the largest of the Svalbard archipelago. Depending on your time of arrival, enjoy strolling around this former mining town, whose parish church and Svalbard Museum make for fascinating attractions. In the afternoon, we board our ship for the trip, the m/v *Hondius*. In the early evening, the ship sails out of Isfjorden, where we see plenty of Dovekie, and we might even spot the first Minke Whale of the trip. *(B,L,D)*

**Thurs., June 11  Route to Raudfjorden**
Sailing to Raudfjorden, on the north coast of Spitsbergen, we take in an expansive fjord spilling with glaciers – and maybe even visited by Ringed and Bearded Seal. There are opportunities of Beluga Whale sightings as there are estimated to be around five to ten thousand Belugas in the Svalbard population. The Beluga has no dorsal fin; a diagnostic feature of whale species that live in the High Arctic such as the Narwhal and Bowhead. It has been postulated that the Beluga’s lack of dorsal fin is an adaptation to living in waters that are frequently covered by ice. The cliffs and shoreline of this fjord also support thriving seabird colonies, rich vegetation, and the possibility of Polar Bear and maybe Red-throated Diver! *(B,L,D)*

**Fri., June 12  The Monaco Glacier**
Today we sail into Liefdefjorden, and cruise within sight of the 5-kilometer-long (3.1 miles) face of the precipitous Monaco Glacier – a truly magnificent sight and experience. The waters in front of this glacier are a favorite feeding spot for thousands of kittiwakes, and the base of the ice is a popular spot for Polar Bear. *(B,L,D)*

**Sat., June 13  Highlights of Hinlopen**
Today we cruise into Hinlopen Strait, home to Bearded Seal, Ringed Seal, and Polar Bear. At the entrance, there is the likely possibility of spotting Blue Whales. After cruising among the ice floes of Lomfjordshalvøya in the Zoicds, you can view the bird cliffs of Alkefjellet with their thousands of Brünnich’s guillemots. On the east side of Hinlopen Strait, we may attempt a landing on Noruaustlandet. Here Reindeer, Pink-footed Goose, and Walrus are likely sights. Nearby Murchison Fjord is a wonderful place to kayak or Zodiac cruise between the islands. There are some excellent hiking routes here, affording us breathtaking views. *(B,L,D)*

**Sun., June 14  Stop at the Seven Islands**
The northernmost point of your voyage may be north of Noruaustlandet, in the Seven Islands. Here you reach 80° north, just 870 km (540 miles) from the geographic North Pole. Be sure to get up to the ship’s bridge and take a picture of the GPS showing your latitude or, better yet, take your own handheld GPS with you and mark in
the waypoint as we are so close to the North Pole! Polar Bear inhabit this region, so the ship may park for several hours among the pack ice before wheeling around west again. (B,L,D)

**Mon., June 15  Sailing the Continental Shelf**
While retracing our route west, keep watch for more Polar Bear and the elusive Greenland (bowhead) Whale. About 40 nautical miles west of Spitsbergen, we sail the edge of the continental shelf. Here, Fin Whale forage during the summer in the upwelling zones (where cold, nutrient-rich water wells up from below the sea’s surface) that run along the Spitsbergen banks. At the mouth of Kongsfjorden, there are great chances of sighting more Minke Whales. (B,L,D)

**Tues., June 16  Forlandsundet | Alkhornet**
The sight and sound of a Walrus haul-out spells Arctic like nothing else can. We visit the Walrus colony on Prince Charles Island and hope to see these odd-looking animals ashore.

Approaching from downwind can often confirm that Walrus are ashore—the smell of a Walrus-haul out is quite...unique! Alternatively, we might sail into St. Johns Fjord or south to the mouth of Isfjorden, landing at Alkhornet. Seabirds nest on these cliffs, Arctic Fox search below for fallen eggs and chicks, and Reindeer graze the sparse vegetation. We arrive in Longyearbyen later for our final night—it's a great time to reflect on a wonderful voyage in this wild and remote place. (B,L,D)

**Wed., June 17  Longyearbyen | Departures**
We disembark in Longyearbyen this morning and we have some time to explore the town, taking home memories that will accompany you wherever your next adventure lies. (B)
**Ship Details: The m/v Hondius**

*M/V Hondius* offers high-quality accommodation for 170 passengers in six grand suites with balconies (27 square meters, 291 square feet), eight junior suites (19 to 20 square meters, 205 to 215 square feet), eight superior cabins (20 to 21 square meters, 215 to 226 square feet), 11 twin deluxe cabins, (19 to 21 square meters, 205 to 226 square feet), 14 twin window cabins (12 to 14 square meters, 129 to 151 square feet) as well as 27 twin porthole cabins, two triple porthole cabins, and four quadruple porthole cabins that vary in size from 12 to 18 square meters, or 129 to 194 square feet. The passenger capacity certificate for *Hondius* is 196 persons. One deck consists of a large observation lounge and separate lecture room, which are reserved for a wide variety of interactive workshops, exhibitions, and performances particular to *Hondius*. Though elegantly designed in stylish mid-century modern décor, this vessel holds true to Oceanwide’s distinctive cozy and informal atmosphere.
