

## Costa Rica Birding & Nature January 13–20, 2017

### Birding and Wildlife Tour Species List

Guides: Greg Smith and Johan Fernández, and nine participants: Trisha, Dave, Stan, Timothy, Tullia, John, Pat, Mike, Nancy

Anhinga, *Anhinga anhinga* – Two were seen roosting along the Rio Sarapiquí  
Bare-throated Tiger-Heron, *Tigrisome mexicanum* – A single individual along the Rio Sarapiquí  
Sunbittern, *Eurypyga helias* – We got to see two birds on rivers in the Rancho Naturalista area  
Russet-naped Wood-Rail, *Aramides albiventris* – Seen at the feeders at La Union, Casa de Cope  
Fasciated Tiger-Heron, *Tigrisoma fasciatum* – Got to see two in the trees on our walk along the river  
Neotropic Cormorant, *Phalacrocorax brasilianus* – We had a number of these birds roosting above the Rio Sarapiquí  
Great Blue Heron, *Ardea Herodias* – Seen sporadically throughout the trip  
Great Egret, *Ardea alba* – Seen on our drive to Gayabo National Park  
Snowy Egret, *Egretta thula* – Seen along the Rio Sarapiquí  
Little Blue Heron, *Egretta caerulea* – Seen along the Rio Sarapiquí  
Cattle Egret, *Bubulcus ibis* – First one was at the Hotel Bougainvillea  
Green Heron, *Butorides virescens* – First one seen was at Ujarras in Cartago  
Yellow-crowned Night-Heron *Nyctanassa violacea* – Numerous solo birds seen along the Rio Tarcoles  
Boat-billed Heron, *Cochleari cochlearius* – One individual along the Rio Sarapiquí  
Black Vulture, *Coragyps atratus* – Everywhere and every day...  
Turkey Vulture, *Cathartes aura* – Again, everywhere and every day...  
King Vulture, *Sarcoramphus papa* – Seen flying over the river at La Selva  
Osprey, *Pandion haliaetus* – One was seen along the Rio Sarapiquí  
Swallow-tailed Kite, *Elanoides forficatus* – One was seen soaring over the Valle de Tuis  
Bicolored Hawk, *Accipiter bicolor* – Seen along the entrance road to Rancho Naturalista  
Gray Hawk, *Buteo plagiadus* – Seen flying over La Selva  
Roadside Hawk, *Buteo magnirostris* – At a number of locations and usually confiding  
Broad-winged Hawk, *Buteo platypterus* – Two flew fairly close to us at La Selva  
Short-tailed Hawk, *Buteo branchyurus* – One was seen overhead at Rancho Naturalista  
Red-tailed Hawk, *Buteo jamaicensis* – Soaring over the communication towers on Cerro Buena Vista  
Collared Forest-Falcon, *Micrastur semitorquatus* – Good looks through the scope at La Selva  
Yellow-headed Caracara, *Milvago chimachima* – The more common of the two caracaras  
Gray-headed Chachalaca, *Ortalis cinereiceps* – Seen everyday at the banana feeders at Rancho Naturalista  
Crested Guan, *Penelope purpurascens* – Seen in a tree on our afternoon walk along La Mina River  
Black Guan, *Chamaepetes unicolor* – Common at both Mirador de Quetzales and Savegre  
Marbled Wood-Quail, *Odontophorus gujanensis* – Heard and almost seen at Esquinas  
Spotted Wood-Quail, *Odontophorus guttatus* – A pair was seen on the grounds of the Savegre Lodge  
Southern Lapwing, *Vanellus chilensis* – A recent arrival in Costa Rica, but you couldn't tell by the numbers  
Northern Jacana, *Jacana spinosa* – More sporadic than it should've been, but we saw a few  
Spotted Sandpiper, *Actitis macularia* – Very common along the Rio Sarapiquí  
Rock Pigeon, *Columba livia* – Pretty common around San Jose  
Red-billed Pigeon, *Patagioenus flavorostris* – Seen on the grounds of the Hotel Bougainvillea  
Band-tailed Pigeon, *Columba fasciata* – Seen both days at the Rio Savegre Lodge

Ruddy Pigeon, *Patagioenas subvinacea* – Heard and then seen above the lodge at Mariano's

Short-billed Pigeon, *Columba nigrirostris* – More often heard than seen at La Selva

\*Inca Dove, *Columbina inca* – Very easy to see at the Hotel Bougainvillea

Ruddy Ground-Dove, *Columbina talpacoti* – We saw a total of seven up at Ujarras in Cartago

White-tipped Dove, *Leptotila verreauxi* – Usually seen everyday, and some with good looks solo individuals

\*White-winged Dove, *Zenaida asiatica* – Mostly on the grounds of the Hotel Bougainvillea

Mourning Dove, *Zenaida macroura* – Only two seen were on the grounds of the Hotel Bougainvillea

Great Green Macaw, *Ara ambiguus* – Best looks were at Heleconia Island

Crimson-fronted Parakeet, *Aratinga finschi* – Common around the Hotel Bougainvillea

Sulphur-winged Parakeet, *Pyrrhura hoffmanni* – Very common along the Rio Savegre valley

Olive-throated Parakeet, *Eupsittula nana* – A single flyover during our final morning at Rancho Naturalista

Crimson-fronted Parakeet, *Psittacara finschi* – Definitely the most common of the parrot family on the trip

Barred Parakeet, *Bolborhynchus lineola* – A small flock was seen up on the hill opposite the lodge at Savegre

Brown-hooded Parrot, *Pyrrilia haemetotis* – Seen along the Rio Sarapiquí

Blue-headed Parrot, *Pionus menstruus* – Great looks at a perched individual in La Amistad NP

White-crowned Parrot, *Pionus senilis* – Perched low and in the morning light at Rancho Naturalista

Squirrel Cuckoo, *Piaya cayana* – Seen at Mirador de Quetzales

Smooth-billed Ani, *Crotophaga ani* – Seen working through the trees at Rancho Naturalista

Groove-billed Ani, *Crotophaga sulcirostris* – Seen along the road down to La Mina River

White-collared Swift, *Streptoprocne zonaris* – Seen randomly throughout the trip, definitely serendipitous

Vaux's Swift, *Chaetura vauxi* – Five were seen flying over La Selva

Gray-rumped Swift, *Chaturina cinereiventus* – Three were seen flying over La Selva

Green Hermit, *Phaethornis guy* – Two were regularly using the upstairs feeders at Rancho Naturalista

Long-billed (Long-tailed) Hermit, *Phaethornis longirostris* – Seen feeding at the La Union, casa de Cope feeders

Stripe-throated (Little) Hermit, *Phaethornis striigularis* – Feeding alongside the Long-billed Hermit

White-necked Puffbird, *Notharcus hyperhynchus* – Good, long looks at a bird sitting on the bridge at La Selva

Garden Emerald, *Chlorostilbon assimilis* - Seen both days at Rancho Naturalista

White-necked Jacobin, *Florisuga mellivora* – Common at Rancho Naturalista

Lesser Violetear, *Colibri thalassinus*- Numerous and feisty around the Mirador de Quetzales feeders

Fiery-throated Hummingbird, *Pantherpe insignis* – The most numerous hummingbird around Mirador de Quetzales

Violet-crowned Woodnymph, *Thalurania colombica* – One of the more common hummingbirds at Rancho Naturalista

Rufous-tailed Hummingbird, *Amazilia tzacatl* – Very common around Hotel Bougainvillea, great looks

Violet Headed Hummingbird, *Klais guimeti* – At the La Union, Casa de Cope site

Crowned Woodnymph, *Thalurina colombica* – One of the more common hummingbirds at Rancho Naturalista feeders

Steely-vented Hummingbird, *Amazilia saucerrottei* – Two were seen at Hotel Bougainvillea, with one giving great looks

Green-crowned Brilliant, *Heliodoxa jacula* – One was seen briefly at Mariano's feeders

White-throated Mountain-gem, *Lampornis castaneiventris* – Seen feeding at Mariano's feeders at Savegre

Ruby-throated Hummingbird, *Archilochus colubris* – We saw three up at Ujarras in Cartago

Magnificent Hummingbird, *Eugene fulgens* – Seen at most stops in the central valley/highlands, but not common

Purple-crowned Fairy, *Heliothryx barroti* – One would make sporadic appearances at Rancho Naturalista

Green-breasted Mango, *Anthracothorax veraguensis* – Sporadic common at Rancho Naturalista

Magenta-throated Woodstar, *Calliphlox bryanti* – Seen at the feeders at Mirador de Quetzales

Scintillant Hummingbird, *Selasphorus scintilla* – Seen at Rio Savegre Lodge and Mirador de Quetzales

Volcano Hummingbird, *Selasphorus flammula* – Seen daily in the highlands and cloud forests

Stripe-tailed Hummingbird, *Eupherusa eximia* – Seen feeding above Savegre Lodge at Mariano's feeders

White-tailed Emerald, *Elvira chionura* – Seen on our walk in La Amistad NP

Snowcap, *Microchera albocoronata* – Seen feeding on the shrubs sporadically at Rancho Naturalista

Gartered Trogon, *Trogon violaceus* – Had up to five of these birds feeding & calling along the Rancho Naturalista road

Collared Trogon, *Trogon collaris* – Both sexes on our walk around Savegre Lodge

Slaty-tailed Trogon, *Trogon massena* – Seen on our final morning at La Selva

Resplendent Quetzal, *Pharomachrus mocinno* – Great looks at a males & females at Mirador de Quetzales

Rufous Motmot, *Baryphthengus martii* – Two were seen near their nesting burrow on the Rio Sarapiquí

Broad-billed Motmot, *Electron platyrhynchum* - Two were seen foraging together at La Selva

Lesson's Motmot, *Momotus mlessoni* – Seen a number of times throughout the trip

Amazon Kingfisher, *Chloroceryle amazona* – Seen along the La Mina River continually moving ahead of us

Green Kingfisher, *Chloroceryle americana* – Perched on a log in the middle of the river in the Valle Tuis

Emerald Toucanet, *Aulacorhynchus prasianus* – We had two coming into the feeding station in Ujarras  
 Collared Aracari, *Pteroglossus torquatus* – Always a few visiting the feeders at Rancho Naturalista  
 Keel-billed Toucan, *Ramphastos sulfuratus* – One was seen along the road to Rancho Naturalista  
 Yellow-throated Toucan, *Ramphastos swainsonii* – Pairs calling repeatedly in different parts of the cloud forest  
 Acorn Woodpecker, *Melanerpes formicivorus* – An easy bird along the Rio Savegre Valley  
 Black-cheeked Woodpecker, *Melanerpes pucherani* – Two were regularly coming into the feeders at Rancho Naturalista  
 Red-crowned Woodpecker, *Melanerpes rubricapillus* – At various locations in the cloud forest  
 Hoffmann's Woodpecker, *Melanerpes hoffmannii* – Common around the Hotel Bougainvillea  
 Hairy Woodpecker, *Picoides villosus* – One was seen in the forest along the road at Savegre Lodge  
 Pale-billed Woodpecker, *Campephilus guatamalensis* – Great looks at two males and a female at La Selva  
 Ruddy Treerunner, *Margarornis rubiginosus* – Seen in the forests around Savegre  
 Plain Xenops, *Xenops minutus* – Seen on the grounds of Esquinas Rainforest Lodge  
 Streaked Xenops, *Xenops rutilans* - Again, seen in the forest around Mirador de Quetzales in a large mixed flock  
 Buff-fronted Foliage-gleaner, *Philydor rufum* – Feeding on moths at Rancho Naturalista  
 Ruddy Foliage-gleaner, *Clibanornis rubiginosus* - Seen on our final morning walk at Wilson Botanical Garden  
 Tawny-throated Leaf-tosser, *Sclerurus mexicanus* – Seen at the moth attractant at Rancho Naturalista  
 Wedge-billed Woodcreeper, *Glyphorhynchus spirurus* – A couple were seen during our walk at La Selva  
 Ruddy Woodcreeper, *Dendrocincia homochroa* – Seen along the Rio Savegre Valley down towards the waterfalls  
 Plain-brown Woodcreeper, *Dendrocincia fuliginosa* – Seen at the moth attractant at Rancho Naturalista  
 N. Barred Woodcreeper, *Dendrocolaptes sanctithoeme* – Seen at the morning moth attractant watch  
 Black-striped Woodcreeper, *Xiphorhynchus lachrymosus* – Seen along the road into Esquinas  
 Cocoa Woodcreeper, *Xiphorhynchus susurrans* – Foraging along the road at Rancho Naturalista  
 Spotted Woodcreeper, *Xiphorhynchus serythropygus* – Seen during the morning moth frenzy at Rancho Naturalista  
 Streak-headed Woodcreeper, *Lepidocolaptes souleyetii* – Seen at the morning moth stakeout at Rancho Naturalista  
 Spot-crowned Woodcreeper, *Lepidocolaptes affinis* – Seen working the trees in our walk around the Savegre Lodge  
 Spotted Woodcreeper, *Xiphorhynchus erythropygius* – Seen during the morning raid by the moth feeders  
 Brown-billed Scythebill *Campylorhamphus pusillus* – Seen along the road into La Amistad National Park  
 Plain Antvireo, *Dysithamnus mentalis* – Seen during one of our morning outings to the moth attractant at Rancho N  
 Slaty Antwren, *Myrmotherula schisticolor* – Seen at the Rancho Naturalista moth attractant  
 Yellow-bellied Elaenia, *Elaenia flavogaster* – First one seen was foraging over the La Mina River  
 Mountain Elaenia, *Elaenia frantzii* - In the forest around Savegre in a large mixed flock  
 Torrent Tyrannulet, *Serpophaga cinerea* – Got to see two foraging along the La Mina River  
 Olive-striped Flycatcher, *Mionectes olivaceus* – Seen down the road by the pond at Savegre  
 (H) Royal Flycatcher, *Onychorhynchus coronatus* – Heard only at La Selva  
 Ochre-bellied Flycatcher, *Mionectes oleagineus* – Along the road at Rancho Naturalista  
 Paltry Tyrannulet, *Zimmerius vilissimus* – Seen a few times on the trip, and yes, it is small and non-descript  
 Scale-crested Pygmy-Tyrant, *Myiornis atricapillus* – Close looks at two individuals along the trail at Guayabo NP  
 Eye-ringed Flatbill, *Rhynchocyclus brevirostris* – Seen on our morning walk at La Selva  
 Common Tody-Flycatcher, *Todirostrum cinereum* – Seen very close foraging over the La Mina River  
 Tawny-chested Flycatcher, *Aphanotriccus capitalis* – Rancho Naturalista is a consistent place for this rarity  
 Tufted Flycatcher, *Mitrephanes phaeocercus* – Seen a number of times, but the best look was at Savegre  
 Olive-sided Flycatcher, *Contopus cooperi* – One seen flycatching from the top of a tree around Savegre Lodge  
 Eastern Wood-Pewee, *Contopus virens* – Seen and heard during our stay at Wilson Botanical Garden  
 Yellow-bellied Flycatcher *Empidonax flaviventris* - A pair were seen foraging around the moth attractant  
 Dark Pewee, *Contopus lugubris* – Two were seen around the trout pond below the Savegre Lodge  
 Yellowish Flycatcher, *Empidonax flavescens* – Certainly one the most common *Empidonax* flycatchers on the trip  
 Black-capped Flycatcher, *Empidonax atriceps* – First seen down near the quetzals at Mirador de...  
 Black Phoebe, *Sayornis nigricans* – Seen at the pond along the Rio Savegre  
 Long-tailed Tyrant, *Colonia colonus* – Seen down near the river at La Selva  
 Dusky-capped Flycatcher, *Myarchus tuberculifer* – First one was during the morning moth frenzy  
 Great Kiskadee, *Pitangus sulphuratus* – A pretty common bird in most of Costa Rica with appropriate habitat  
 Boat-billed Flycatcher, *Megarynchus pitangua* – Hotel Bougainvillea had a couple of confiding pairs  
 Social Flycatcher, *Myiozetetes similis* – First ones seen were on our morning walk at Rancho Naturalista  
 Tropical Kingbird, *Tyrannus melancholicus* – Certainly the most widespread and most common flycatcher in Costa Rica  
 Barred Becard, *Pachyramphus versicolor* - Both sexes were seen in the big mixed flock at Savegre Lodge  
 Purple-throated Fruitcrow, *Querula purpurata* - Good, long looks at a male a male and three females overhead

Snowy Cotinga, *Carpodectus antoniae* – Seen perched and then flying overhead on the entrance road to La Selva  
Masked Tityra, *Tityra semifasciata* – A pair were seen foraging on our walk along the road to La Selva  
White-ruffed Manakin, *Corapipo altera* – Seen along the road at Rancho Naturalista  
Red-capped Manakin, *Pipra mentalis* – Seen during our morning walk at La Selva  
White-collared Manakin, *Manacus candei* – Seen foraging off to the side of the La Union, Casa de Cope feeders  
Yellow-throated Vireo, *Vireo flavifrons* - First two were seen very close at Hotel Bougainvillea  
Yellow-winged Vireo, *Vireo carmioli* - Easily seen at along the Savegre Valley Road  
Brown-capped Vireo, *Vireo leucophrys* – Common in the lower Rio Savegre Valley  
Philadelphia Vireo, *Vireo philadelphicus* – Best looks were at the Hotel Bougainvillea  
Brown Jay, *Cyanocorax morio* – Seen only on the grounds of Hotel Bougainvillea  
Gray-breasted Martin, *Progne chalybea* – Seen about every other day in small numbers  
Mangrove Swallow, *Tachycineta albilinea* – Definitely the common swallow on the Rio Sarapiquí  
Blue-and-white Swallow, *Pygochelidon cyanoleuca* -The most common swallow for the trip  
No. Rough-winged Swallow, *Stelgidopteryx serripennis* - Certainly the more common of the Rough-wingeds up north  
Southern Rough-winged Swallow, *Stelgidopteryx ruficollis* – Seen along the Rio Sarapiquí  
Rufous-breasted Wren, *Thryothorus rutilus* – The more common of the wrens at Hotel Bougainvillea  
Stripe-breasted Wren, *Cantorchilus thoracicus* – One put in an appearance at the moth feeder  
Bay Wren, *Cantorchilus nigricappallus* – Seen along the river in dense vegetation near Rancho Naturalista  
Band-backed Wren, *Campylorhynchus zonatus* – Seen during our last breakfast at Rancho Naturalista  
Rufous-naped Wren, *Campylorhynchus rufinucha* - Seen well up at Mirador de Quetzales and at Hotel Bougainvillea  
Isthmian Wren, *Thryothorus modestus* – A pair were very confiding along the Rio Cato  
House Wren, *Troglodytes aedon* – Seen on the front area of the Hotel Bougainvillea  
Timberline Wren, *Thryorchilus browni* – Seen up on Cerro Buena Vista at 11,000-feet  
Gray-breasted Wood-Wren, *Hericorhina leucophrys* – Loud, vocal and common...  
White-breasted Wood-Wren, *Henichorhina leucosticta* – Always at least one at the Rancho Naturalista moth attractant  
Black-faced Solitaire, *Myadestes melanops* - Seen and heard along the trail out of Mariano's place  
Black-billed Nightingale-Thrush, *Catharus gracilirostris* – Seen in the mixed flock at at Mirador de Quetzales  
Ruddy-capped Nightingale-Thrush, *Catharus frantzii* – Seen at the Rio Savgre lodge forested area  
Wood Thrush, *Hyocichla mustelina* – Seen during the morning outing to La Selva  
Sooty Thrush, *Turdus nigrescens* – Sporadically common along the Rio Savegre valley highlands  
Mountain Thrush, *Turdus plebejus* – Less common than the Sooty Thrush, first seen at Mirador de Quetzales  
Pale-vented Thrush, *Turdus obsoletus* – A total of four were seen at La Selva  
Clay-colored Thrush, *Turdus grayi* – The national bird of Costa Rica, probably because it is found country-wide  
White-throated Thrush, *Turdus assimilis* – Came into the feeders at La Union, casa de Cope  
Gray Catbird, *Dumetella carolinensis* – Seen in the gardens of Hotel Bougainvillea  
Black-and-Yellow Silky Flycatcher, *Phainoptila melanoxantha* – Two were seen in a mixed flock at Mirador de Quetzales  
Long-tailed Silky-flycatcher, *Ptilogonys caudatus* – Common and so very photogenic around the Rio Savegre Lodge  
Northern Waterthrush, *Parkesia noveboracensis* – Seen very well along the La Mina River  
Tennessee Warbler, *Vermivora peregrina* – Easily the most common warbler we encountered  
Golden-winged Warbler, *Vermivora chrysoptera* – Seen the best at Rancho Naturalista bird bath  
Flame-throated Warbler, *Parula gutturalis* – Seen well in the Rio Savgre Valley, especially at Miriam's  
Kentucky Warbler, *Geothlypis Formosa* – One would show up every morning for a moth breakfast at Rancho Naturalista  
Tropical Parula, *Parula pitiayumi* – One was seen at eye-level from the second floor deck at Rancho Naturalista  
American Redstart, *Setophaga ruticilla* – An adult female and male were both seen at Savegre  
Yellow Warbler, *Dendroica petechial* - Not the least bit uncommon, found in most all habitats  
Chestnut-sided Warbler, *Dendroica pensylvanica* – Not uncommon in most any habitat along the trip route  
Black-throated Green Warbler, *Dendroica virens* – Good looks at a bird as we walked down the Rio Savegre Valley Road  
Black-and-White Warbler *Mniotilta varia* – First was seen as we were birding around the Rio Savegre Lodge  
Golden-crowned Warbler, *Basileuterus culicivorus* - Seen on our morning walk along entrance road to Rancho Naturalista  
Townsend's Warbler, *Setophaga townsendi* – Seen with the small mixed flock at Mirador de Quetzales  
Wilson's Warbler, *Wilsonia pusilla* – Seen most every day in cloud forest habitat  
Collared Redstart, *Myioborus torquatus* – First of many sightings was at Mirador de Quetzales  
Wrenthrush, *Zeledonia coronate* – Seen during our hike to the quetzals at Mirador de Quetzales  
Rufous-capped Warbler, *Basileuterus rufifrons* – Seen along the riparian at Rio Savegre  
Buff-rumped Warbler, *Basileuterus fulvicauda* – At least five along the Rio Sarapiquí  
Bananaquit, *Coereba flaveola* – Sporadic, but seen at most all of our lodging locations

Common Bush-Tanager, *Chlorospingus ophthalmicus* – Not as common as the Sooty, but seen at almost every lodge  
Sooty-capped Chlorospingus, *Chlorospingus pileatus* - One or two were always showing up at banana feeders  
Red-throated Ant Tanager, *Habia fuscicauda* – Always one or two at the moth extravaganza  
Carmioli's Tanager, *Chlorothraupis carmioli* – Seen during breakfast at Rancho Naturalista  
Summer Tanager, *Pirangia rubra* – Seen or heard every day along the Rio Savegre  
Flame-colored Tanager, *Piranga bidentata* – Common in the mid-elevations of the mountain ranges of our tour  
White-shouldered Tanager, *Tachyphonus rufus* – Three were seen at La Selva  
White-lined Tanager, *Tachyphonus rufus* – Seen at the morning moth feed at Rancho Naturalista  
Crimson-collared Tanager, *Ramphocelus sanguinolentus* – Seen in the gardens at Rancho Naturalista  
Passerini's Tanager, *Ramphocelus passerinii* – One of the more common tanagers at Rancho Naturalista  
Blue-gray Tanager, *Thraupis episcopus* – Seemed to be in most all of the habitats  
Palm Tanager, *Thraupis palmarum* – One of the very abundant tanagers on the trip  
Silver-throated Tanager, *Tangara icterocephala* – One of the more common tanagers in the highlands  
Bay-headed Tanager, *Tangara gyrola* – The first seen was at the Rancho Naturalista feeders  
Plain-colored Tanager, *Tangara inornata* – Seen at the morning moth buffet  
Golden-hooded Tanager, *Tangara larvata* – Seen daily at Rancho Naturalista  
Spangle-cheeked Tanager, *Tangara dowii* – Seen at Rio Savegre Lodge feeding on berries  
Scarlet-thighed Dacnis, *Dacnis venusta* – We saw four on our morning walk at Rancho Naturalista  
Green Honeycreeper, *Chlorophanes spiza* – There always seemed to be at least one pair at most banana feeders  
Red-legged Honeycreeper, *Cyanerpes cyaneus* – Seen well at the La Union, casa de Cope feeders  
White-collared Seedeater, *Sporophila torqueola* – The more common seedeater on the trip  
Yellow-faced Grassquit, *Tiaris olivacea* – Seen well at a number of locations, usually in roadside grasses  
Slaty Flowerpiercer, *Diglossa plumbea* – Came into the Mirador de Quetzales hummingbird feeders  
Yellow-thighed Finch, *Pselliophorus tibialis* – Also a regular visitor to the Mirador de Quetzales feeders  
Large-footed Finch, *Pezopetes capitalis* – Seen feeding 15-feet below us at Miriam's Restaurant's feeders  
Orange-billed Sparrow, *Arremon aurantirostris* – One or two were always present at the Rancho Natural moth attractant  
Chestnut-capped Brush-Finch, *Arremon aurabtirostris* – Seen on the forest floor at Savegre Lodge  
Rufous-collared Sparrow, *Zonotrichia capensis* - Almost everywhere, great looking bird  
Volcano Junco, *Junco vulcani* – Seen up on Cerro Buena Vista road  
Grayish Saltator, *Saltator coerulescens* – Seen at our Ujarras lunch stop  
Buff-throated Saltator, *Saltator maximus* – Very good looks along the Rancho Naturalista road  
Black-headed Saltator, *Saltator atriceps* – Came in for a brief appearance at the Rancho Naturalista feeders  
Black-faced Grosbeak, *Caryothroustes poliogaster* – We had three of these at La Selva  
Rose-breasted Grosbeak, *Pheucticus ludovicianus* - Saw two along the road about the Savegre Lodge  
Red-breasted Blackbird, *Sturnella militaris* – Great looks at a few individuals in the Valle de Tuis  
Melodious Blackbird, *Dives dives* – Seen and heard at the very back of the Hotel Bougainvillea grounds  
Great-tailed Grackle, *Quiscalus mexicanus* – Everywhere, everywhere, everywhere, everywhere...  
Giant Cowbird, *Molothrus oryzivorus* – Seen flying overhead at Hotel Bougainvillea  
Orchard Oriole, *Icterus spurious* – Only one seen was in the corridor along the Rio Cota  
Baltimore Oriole, *Icterus galbula* – We saw three at the Hotel Bougainvillea, most for the trip  
Crested Oropendola, *Psarocolius decumanus* – A few were seen every day in areas of cloud forest  
Chestnut-headed Oropendola, *Psarocolius wagleri* - Best looks were at the solo bird at the Ujarras feeders  
Montezuma Oropendola, *Psarocolius montezuma* - There were six in the trees behind the feeders at Ujarras  
Yellow-crowned Euphonia, *Euphonia luteicapilla* – Seen at the Rancho Naturalista feeders during breakfast  
Olive-backed Euphonia, *Euphonia gouldi* – Seen at the La Union, Casa de Cope feeders  
White-vented Euphonia, *Euphonia minuta*- We saw two on our Rancho Naturalista walk  
Golden-browed Chlorophonia, *Chlorophonia callophrys* –A few were seen feeding on the apple trees at Mariano's  
Yellow-bellied Siskin, *Carduelis xanthogastra* – Saw a few of these throughout the trip, but not common  
House Sparrow, *Passer domesticus* – Seen around the grounds of the Hotel Bougainvillea

**TOTAL 255**
